Project Overview
The Tennessee Duck River Development Agency (DRA) has undertaken a Comprehensive Regional Water Supply Plan for Bedford, Coffee, Marshall, Maury, and southern Williamson Counties to meet future water demands and address concerns with possible water shortages brought on by drought conditions. The goal is to develop a plan with a 50-year projection and a 100-year planning horizon that will provide direction to the DRA for the management of available water resources, including the implementation of specific water supply infrastructure projects if necessary. The plan will include specific recommendations, including budgets and implementation timelines, on water supply and water management projects.
